| ● Usability Testing     | ● Product Designing     |

## PROJECTS

---

### UNIFYCLOUD WEBSITE ([www.unifycloud.in](http://www.unifycloud.in)) ([www.unifycloud.com](http://www.unifycloud.com)):

- As a UI UX Designer, successfully developed the website **unifycloud.in** and **unifycloud.com** from scratch.
- This involved not only building a fully responsive and modern web interface but also creating all custom graphics and icons for the site.
- My role encompassed both front-end development and user interface using HTML5, CSS3, JavaScript, and Bootstrap to create a seamless, visually engaging user experience.
- The project demonstrated my ability to manage the entire user interface user experience development process, from wireframes to final deployment, ensuring optimal performance and accessibility across all devices.

### Cybersecurity Dashboard Revamp (UI & UX)

- Led the complete development of an outdated cybersecurity Dashboard by implementing a modern UI theme using HTML, CSS, Bootstrap (v5).
- The project involved a thorough removal of outdated dependencies, old themes, and older versions of Bootstrap.
- Created a visually appealing and highly functional dashboard improving user experience and usability across devices.
- This provided a clean interface with updated elements, ensuring enhanced navigation and performance for users.

### AWS Cybersecurity Dashboard (UI & UX)

- Implemented a comprehensive AWS Cybersecurity Portal, integrating modern user interface, utilising HTML, CSS, and Bootstrap 5.
- The project involved upgrading the platform to the latest version of Bootstrap, along with the creation and incorporation of new logos, icons, and visual elements.
- It improved navigation, clarity, and functionality, ensuring the portal met contemporary user expectations.

### Cybersecurity AI risk management Dashboard (UI & UX)

- Developed a Cybersecurity AI Risk Management Dashboard from scratch, utilising HTML, CSS, and Bootstrap 5.
- This involved creating a fully responsive and user-friendly interface, along with custom graphics and icons, to provide a modern and intuitive user experience.
- The dashboard is crafted to effectively present AI-driven risk management insights, ensuring seamless interaction.
- It emphasised clarity, functionality, and a sleek visual aesthetic aligned with cybersecurity industry standards.

## AI Command Center Portal (UI & UX)

- Developed **AI Command Center**, a centralised portal to list and showcase multiple AI use cases in one place.
- This tool is created to assist project managers in easily presenting use cases to clients, improving efficiency and clarity.
- The portal is developed using the latest design patterns and the most recent version of Bootstrap, ensuring a modern, responsive, and visually appealing interface.
- It is focused on delivering a streamlined user experience, making it easy to navigate and display AI-driven solutions.

### Technologies Used:

- o **Designing:** Figma.
- o **Frontend:** HTML5, CSS3, Bootstrap(5).
